"STORMWATER SMART" REMINDERS

As the seasons change to Fall and Winter, being aware of how you impact stormwater runoff is more important than ever! Do your part to protect our resources with the following:

- * Before raking your yard free of leaves, consider mulch-mowing your leaves back into the grass. This can help strengthen the soil and reduce stormwater runoff. Better yet - just leave some leaves on the ground!
- * Leave perennials and annuals instead of cutting them back, as they help provide important habitat to pollinators during the cold months and can help catch excess runoff.
- * A little salt goes a long way! Do not over apply deicing materials, and opt for non-toxic, pet-friendly options. Store materials under cover and in a leak proof container.
- * Pile snow on vegetated areas and away from storm drains, pipes or ditches. Snow melt can soak directly into the ground and help decrease runoff.
